The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the previous year except for change in the accounting policy for depreciation.

2.2 Use of estimates

The preparation of the financial statements in conformity with the accounting standards generally accepted in India requires, the management to make estimates that affect the reported amount

of assets and liabilities, disclosure of contingent liabilities as at the date of the financial statement and reported amounts of revenues and expenses for the year. Although these estimates are based upon management's best knowledge of current events and actions, actual results could differ from these estimates. Difference between the actual results and estimates are recognized in the periods in which the results are known/materialize.

2.3 Inventories

2.5 Cash flow statement

Cashflows are reported using the indirect method, whereby profit/(loss) before extra-ordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

Net investments in non-integral foreign operations are carried at historical cost.

The Company enters into forward exchange contract to hedge its risk associated with Foreign currency fluctuations. The premium or discount arising at the inception of a forward exchange contract is amortized as expense or income over the life of the contract. In case of monetary items which are covered by forward exchange contract, the difference between the year end rate and rate on the date of the contract is recognized as exchange difference. Any profit or loss arising on cancellation of a forward exchange contract is recognized as income or expense for that year.

2.12 Government grants and subsidies:

Government grants and subsidies are recognized when there is reasonable assurance that the Company will comply with the conditions attached to them and the grants / subsidy will be received.

Government grants in the nature of promoters' contribution like investment subsidy, where no repayment is ordinarily expected in respect thereof, are treated as capital reserve.

Government grants in the form of non-monetary assets, given at a concessional rate, are recorded on the basis of their acquisition cost. In case the non-monetary asset is given free of cost, the grant is recorded at a nominal value.

2.13 Investments

Long-term investments are stated at cost less provision for diminution, other than temporary, in value. Current investments are stated at lower of cost and market value.

(b) Post retirement:

Post Retirement Benefits comprise of Provident Fund, Superannuation Fund and Gratuity which are accounted for as follows:

i) Provident Fund (Government PF)

ii) Superannuation Fund

This is a defined contribution plan. The company contributes a sum equivalent to defined contribution plan for eligible employees' salary towards superannuation fund administered by the Trustees and managed by Life Insurance Corporation of India (LIC). The Company has no further obligations for future superannuation benefits other than its annual contributions and recognizes such contributions as expense in the year incurred.

iii) Gratuity Fund

This is a defined benefit plan. The Company makes annual contribution to a Gratuity Fund administered and managed by a Trust through Life Insurance Corporation of India. The net present value of obligation towards gratuity is actuarially determined based on Projected Unit Credit method as at the Balance Sheet date. Actuarial gains and losses are recognised in the Accounts.

2.15 Borrowing cost

Borrowing costs, if any, identifiable with an asset under construction are capitalized as part of qualifying fixed assets when it is possible, that they will result in future economic benefits. Other borrowing costs are expensed.

2.16 Segment reporting

a) Revenue and expenses have been identified to segments on the basis of their relationship to the operating activities of the segment.

- b) Revenue and expenses, which relate to the enterprise as a whole and not allocable to segments on a reasonable basis, have been included under “unallocated corporate expenses”.

2.17 Leases

Leases are classified as finance or operating leases depending upon the terms of the lease agreements. Assets held under finance leases are recognised as assets of the Company on the date of acquisition and depreciated over their estimated useful lives using the method and rates applicable to the class of asset as described in Para 2.6 above. Finance cost is treated as period cost using effective interest rate method and expensed. Rentals payable under operating leases are charged to Statement of Profit & Loss of the period to which it relates.

2.18 Earnings per share

Basic and diluted earnings per share are computed in accordance with Accounting Standard 20 - ‘Earnings per share’. Basic earnings per share are computed by dividing the net profit after tax by the weighted average number of equity shares outstanding during the year.

Diluted earnings per share reflect the potential dilution that could occur if securities or contracts to issue equity shares were exercised or converted during the year. Diluted earnings per share are computed using the weighted average number of equity shares outstanding during the year and dilutive potential equity shares outstanding at year end.

2.19 Taxes on income

Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the applicable tax rates and the provisions of the Income Tax Act, 1961 and other applicable tax laws.

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay

normal income tax. Accordingly, MAT is recognized as an asset in the Balance Sheet when it is highly probable that future economic benefit associated with it will flow to the Company.

Deferred tax is recognised, subject to the consideration of prudence, on timing differences, being the difference between taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date. Deferred tax assets are recognised and carried forward only to the extent there is reasonable certainty that sufficient future taxable income will be available against which such asset items can be realised.

2.20 Research and development expenses

All revenue expenditure related to research and development are charged to the respective heads in the Statement of Profit & Loss. Capital expenditure incurred on research and development is grouped under fixed assets and depreciated in accordance with the depreciation policy of the Company.

2.21 Impairment of assets

At each Balance Sheet date, the carrying values of the tangible and intangible assets are reviewed to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where there is an indication that there is a likely impairment loss for a group of assets, the company estimates the recoverable amount of the group of assets as a whole, to determine the value of impairment.

2.22 Provisions, contingent liabilities and contingent assets

A Provision is recognized, in terms of Accounting Standard 29 - ‘Provisions, Contingent Liabilities and Contingent Assets’ notified by the Companies (Accounting Standards) Rules, 2006, when there is a present obligation as a result of a past event, and it is probable that an outflow of resources will be required to settle the obligation, which can be

reliably estimated. Provision is not discounted to its present value and is determined based on the best estimate required to settle the obligation at the balance sheet date. Provisions are reviewed at each balance sheet date and adjusted to reflect the best current estimate.

Contingent Liabilities are recognised only when there is a possible obligation arising from past events, due to occurrence or non-occurrence of one or more uncertain future events, not wholly within the control of the Company, or where any present obligation cannot be measured in terms of future outflow of resources, or where a reliable estimate of the obligation cannot be made. Obligations are assessed on an ongoing basis and only those having a largely probable outflow of resources are provided for.

Contingent Assets are not recognised in the financial statements.

2.23 CENVAT credit

CENVAT credit on materials purchased / services availed for production / input services are taken into account at the time of purchase. CENVAT credit on purchase of capital items wherever applicable are taken into account as and when the assets are acquired. The CENVAT credits so taken are utilised for payment of excise duty on goods manufactured / service tax on output services. The unutilised CENVAT credit is carried forward in the books.

2.24 Operating cycle

Based on the nature of products / activities of the Group and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Group has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

(ii) The financial statements of the Company and its subsidiary companies have been combined on a line-by-line basis by adding together like items of assets, liabilities, income and expenses. The intra-group balances and intra-group transactions and resultant unrealized profits or losses, unless cost cannot be recovered have been fully eliminated.

(iii) The consolidated financial statements include the share of profit / loss of the associate companies which have been accounted for using equity method as per AS 23 Accounting for Investments in Associates in Consolidated Financial Statements. Accordingly, the share of profit/ loss of each of the associate companies (the loss being restricted to the cost of investment) has been added to / deducted from the cost of investments.

(iv) The excess of cost to the Group of its investments in the subsidiary companies over its share of equity of the subsidiary companies, at the dates on which the investments in the subsidiary companies were made, is recognised as 'Goodwill' being an asset in the consolidated financial statements and is tested for impairment on annual basis. On the other hand, where the share of equity in the subsidiary companies as on the date of investment is in excess of cost of

investments of the Group, it is recognised as 'Capital Reserve' and shown under the head 'Reserves & Surplus', in the consolidated financial statements. The 'Goodwill' / 'Capital Reserve' is determined separately for each subsidiary company and such amounts are not set off between different entities.

- (v) In case of the foreign subsidiary, being non-integral operations, revenue items are consolidated at the average rate prevailing during the year. All the assets and liabilities are converted at the rate of prevailing at the year end. Any exchange difference arising on consolidation is recognized in the exchange fluctuation reserve.
- (vi) Minority interest in the net assets of the consolidated subsidiaries consist of the amount of equity attributable to the minority shareholders at the date on which investments in the subsidiary companies were made and further

movements in their share in the equity, subsequent to the dates of investments. Net profit/loss for the year of the subsidiaries attributable to minority interest is identified and adjusted against the profit after tax of the Group in order to arrive at the income attributable to the shareholders of the Company.

- (vii) The difference between the cost of investment in the subsidiary and the share of net assets at the time of acquisition of shares in the subsidiary is identified in the consolidated financial statements as Goodwill or Capital Reserve as the case may be.
- (viii) Goodwill arising on consolidation is not amortized but tested for impairment.
- (ix) The following subsidiary companies and associates have been considered in the preparation of consolidated financial statements:
